1990.66.144	Catalog, Trade	"G.S. Flexo complete Catalog 60" with May 1962 supplement: a) green and white softcover saddle stitched 56-page volume; images on covers and content in black and white; b) single double sided sheet with whit and black images.	Fair
1990.66.145	Catalog, Trade	."G-S Crystals complete catalog No. 200 Fancy and Round": blue and white softcover 60-page saddle stitched book with white and black images; cut-out borders index pages; "APRIL '81" hand written in black marker on front cover.	Fair

1975.59.12	Chair	<p>Stained and varnished mahogany chair. Top rail is flat with a shaped profile forming two arches, back splat is urn-shaped, screw holes in back are hidden with rounded plugs, front legs are slightly shaped with a cabriole curve and there is stretcher on each side. Seat is covered with a white, purple, pink and green floral upholstery over foam rubber with a purple trim and secured with brown plastic-covered steel tacks. Damaged original caning with wire repairs is in place under the upholstery.</p>	Fair
1980.3.1	Chair	<p>Wicker chair painted black: back edging is rolled with open work pattern with band of rectangular check effect, back edge extends slightly into seat to form short arm rests; seat is ply perforated with star shaped pattern (probably a replacement for the original seat); legs are wrapped and capped with metal; cross braced; front apron.</p>	Poor
2012.INV.171	Chair	<p>Varnished wooden chair. Top rail is carved with a low relief design of scrolls and acanthus with a textured background. Back has four turned bannisters and turned stiles with bentwood brace elements which are screwed into seat. Seat is molded and front legs are turned. Turned double stretchers at front, double stretchers at sides and single at back.</p>	Fair
2012.INV.187	Chair	<p>White wooden arm chair with upholstered cushion: top rail is curved with shaped profile, cross rail extends to the front to form arm rests, ten turned rungs between seat and cross rail and six small ones between cross rail and top rail; metal rod reinforcements between rungs; four turned legs with two spindles on each side and wire crossbars; foam cushion is upholstered in white fabric.</p>	Fair
2013.INV.853	Chair	<p>Light coloured varnished wooden chair: straight legs with rounded exterior corners and four stretches (front and back slightly higher than lateral railings), seat is slightly proud of railing and has shaped indentation, straight back with wider backrest top and lower rail centred below.</p>	Fair

1980.122.2	Chair, Kitchen	Green/yellow wooden kitchen chair: back is slightly curved with two side posts proud of top rail, four rungs, turned legs angled 45° outward, one strainer per side; has been painted several times one colour over another; underside has written in black: "Bush / Van / B. C."	Fair
1989.40.2	Chair, Morris	Oak, Morris-style recliner armchair. Frame has plank construction with shaped front legs decorated with carved claws, a curved front apron with carved petal decoration at the bottom corners and curved back legs with a cut-out notched section to hold a metal cross-bar support (missing). Arms are also shaped and rounded at the top edges with four turned supporting spindles on each side. The back frame is attached with brass hinges. Two loose, sprung cushions which fit the profile of the back and seat were found with the chair. Chair rests on four wooden castors.	Fair
1989.40.1 a-b	Chair, Morris	Oak, Morris-style recliner armchair. a) Thick, solid chair frame with wide, turned front legs and arms which form rectangular, hinged storage compartments and are supported by five turned spindles. Back legs are thick and curved at the top to hold the iron notched bracket and cross-bar to alter the angle of the back section. Seat is covered with base upholstery of jute webbing straps and a yellow cotton cover to support a cushion. b) Back frame, slightly curved profile with three horizontal supporting members. Frame fits into brackets on the back seat rail. A loose, foam cushion upholstered in off-white floral fabric was found with the chair and fits the profile of the back frame.	Fair

2012.INV.179	Chair, Office	Varnished oak swivel office chair with black leather upholstery on the back (damaged) and seat. Upholstery is trimmed with black tape and secured with black coated steel tacks. Back has a rounded top rail which attaches to arms. Seat attaches to a metal mechanism with two springs and screws for adjusting the height and tilt resistance of the chair. Mechanism attaches to a curved cross-frame base with one remaining castor attached.	Fair
1974.54.2	Chair, Side	Stained and varnished oak side chair with black leather seat. Top rail and back-splat are flat with a shaped profile, seat is fixed with steel tacks, front legs are shaped with a slight curve and carved with a claw foot at the base. Stretchers on all sides.	Fair
1974.54.3	Chair, Side	Stained and varnished oak side chair with black leather seat. Top rail and back-splat are flat with a shaped profile, seat is fixed with steel tacks, front legs are shaped with a slight curve and carved with a claw foot at the base. Stretchers on all sides.	Fair
2013.INV.857	Chair, Swivel	Light coloured office swivel wooden chair without base: formed wooden seat, slightly proud of apron, affixed to metal tilt mechanism at top of swivel column, metal dome cover and threaded ring still attached; back has top and mid rails of similar heights, arm support and arm rest form one piece that attaches to stiles at same height as mid rest; small paper label with adjustment instructions adhered to seat underside; chair does not have a base.	Fair
2012.INV.195	Chair, Tablet-Arm	Varnished oak tablet-arm chair with "___OOL OF/ NURSING" stencilled on the back of the top rail. Chair is largely rectilinear with slightly curved back rails, wide tablet-arm on the PR side, a molded seat and legs slightly tapered at the base. Four slats span the side stretchers creating an open shelf and small metal disks are attached to each foot.	Fair

1976.5.111	Charger, Battery	Canadian General Electric company "Tungar" battery charger, steel case, painted black with a handle at the top. Manufacturer's plate at one end and power cable and clip cable at the other.	Fair
1991.53.146	Chart	Glass and wood framed chart of "FLANGES" at 150lbs and 300lbs printed on dark green paper with cream coloured print. Wooden frame has 2 white metal attachments to back of frame on both sides so it may be wall mounted. Back of piece is simple plywood and both the plywood backing and wood frame show designs of having been around spray painting in white.	Good
2013.INV.33	Chase	Steel chase containing assembled type, quoins and furniture (spacing blocks). Type reads "MOTOCYCLE" and there are four quoins, twenty three wooden blocks and three lead spacers.	Fair
2013.INV.694	Chest of Drawers	Small, dark-stained wooden drawer unit with an open front and three drawers (although the frame has runners to hold five). Each drawer has nine slots running parrallel to the front edge. There are rebates for two hinges in the top edge of the unit.	Fair
1990.66.66a-b	Chuck	Chuck in plastic case; a) small size chuck (lathe chuck?) with long tapered shaft; b) clear hard plastic cylindrical case; c) red plastic cap with three prongs inside.	Good
1978.92.19	Clamp, Dental	Small metal, butterfly shaped tooth clamp. Marked "#1" for premolar Upper Bicuspid.	Good
1978.92.20	Clamp, Dental	Metal tooth clamp, marked #5 on side with two SS and a W on top ridge. For upper molars.	Fair
1978.92.21	Clamp, Dental	Metal, butterfly shape tooth clamp. Marked "Ivory/ Pat 88" on top ridge and #14A on side. For molars.	Excellent

1990.66.152	Cleaner, Watch	"L&R Precision Cleaning Machine" serial number 9207 with six cleaning jars: a) black heavy metal base with square chromed metal post centre; base holds three large jars and has tall cylindrical sleeve? on fourth corner; small motor with rotary blade affixed to post by metal clamp; electrical cable from motor runs through post, two-prong electrical cord affixed bottom back; centre front control panel extends forward, embossed "L&R MASTER" below rotating switch; one light and two other buttons activate machine; b-g) clear glass jars with threaded finish; "L&R" embossed centre front; all jars contain a metal 5-point star; jars appear to form two sets numbered 1-3; bb-dd) dark bakelite?/hard plastic? round covers, underside has grooved ring, not threaded; ee-gg) dome style silvertone screw caps with grip ring; h) green plastic carrier with three compartments; handle reinforced with black electrical tape wrap; i) L&R wrench, two prong open end on one side, small hole on other; jars b, e-g still have liquid content.	Fair
1974.77.14	Comforter	Down-filled comforter: flower pattern and blue border on one side, flower pattern on other.	Good
1974.77.15	Comforter	Eiderdown quilted comforter, with black satin on one side, red (Palo de Rosa) with black border on other.	Good
1974.77.16	Comforter	Hand-tied, yellow polished cotton comforter, filled with cotton.	Fair
1974.36.12	Counter, Game	Natural, round wooden counter.	Good
1974.36.13	Counter, Game	Natural, round wood counter.	Good
1974.36.14	Counter, Game	Natural, small wood counter for game.	Good
1974.36.15	Counter, Game	Natural wood counter piece for game.	Good
1990.66.92a-d	Cup, Oil	Two wooden agate cup oil holders: a-b) dark wooden inverted cone turned base (a) with decorative banding with light brown agate insert with beveled edge and round well centre top; lid (b) has rounded edge and fits over insert; c-d) brown wooden cylindrical base (c) with carved ring surrounding the reddish agate insert centre top; insert has beveled edge and round well centre; dome style cap (d) fits over exterior ring side to close.	Fair

1990.66.61	Cutter, Metal	"JPB" angled end, fine tip cutters; manufacturer's stamp at joint above enameled red dot.	Fair

SEPT. 1, 1874"; three tools appear to have been modified to serve its present purpose, numbers stamped on collars may or may not relate to original purpose; a) hollow square key on side stamped 6, square tip on side stamped 5; b) metal jacket forming square key and stamped 8, square tip on side stamped 2; c) both square tips, stamped 9, 10.	Fair

1990.66.68a-j	Tool	Ten assorted wrist watch case back removers: a) tie-shaped handle, with rectangular notch on one edge, tapered conical ring with fitting pattern on end; b) long rectangular handle with rounded end and centre groove, tapered conical ring with fitting pattern on other end; c,d,e) tie-shaped handle, with triangular recess centre, tapered conical ring with fitting pattern on end (size of ring varies per remover); f,g) tie-shaped handle, tapered conical ring with fitting pattern on end; h) long rectangular handle with rounded end; tapered conical ring with fitting pattern on other side; g) has open/close arrows stamped front under ring; i) long rectangular handle with rounded end and centre groove, tapered conical ring with fitting pattern on other end; metal appears burned; open/close arrows stamped front under ring; j) oblong metal handle with centre groove, affixed on one end shallow metal plate with notches; stamped "ORIS" front end of handle, open/close arrows where plate affixed.	Fair
1990.66.74	Tool	12 hole rectangular riveting plate with angled edges, tang runs length of plate.	Good
1990.66.83	Tool	Dark rectangular honing stone with beveled angles on top.	Fair

1990.66.86a-e	Tool	Assorted watch hand removers: a) plunger style hand remover with wooden handle and metal jaws; push button to activate jaws has grip pattern; wooden handle detached; manufacturer's mark stamped on collar; b) "K & D" plunger style hand remover, handle and top missing; manufacturer's stamp on collar; c, d) cannon pinion key stems puller: metal frame with side springs to activate sliding jaws; black plastic knob; e) "K & D" tool (possibly for pinion removal or watch hand removal) with a black turned wooden handle, metal head has perpendicular jaws that are adjusted laterally with thumbscrew and locking nut, central pin activated by metal level attached to top of block; small adjustable thumbscrew with locking nut near handle; manufacturer's mark on metal block.	Fair
1990.66.46	Tool	"Roller Jewell Setting Tool" with wooden handle: light wooden turned handle with push button on top, shaft moves up to form a clamp between the long foot and the movable arm; small straight pin keeps two clamp jaws aligned.	Fair
1990.66.14	Tool	Watch makers press set: hinged wooden box with a "Modele Depose / La Favorite / Fabrication Suisse" black metal press and wooden block for accessories: 26 assorted metal pieces (seems as one more part is missing), one metal handle, eight small glass vials with cork stoppers; two golden watch handles found loose inside box.	Good
1990.66.31	Tool	Metal oiler oil pin in case: a) thin cylindrical textured metal handle with hexagonal finger grip; clamp secures a brass oiler pin with flat tip; b) clear plastic tube with one end closed; c) red plug style plastic cap.	Good
1990.66.33	Tool	Hard Arkansas polish stone cut into long thin triangular prism.	Good
1990.66.34	Tool	"FEOLA" aluminum dust blower: small cylindrical body, back half pushed into front, long, thin brass pipe affixed centre front; has several hand made markings and manufacturer's stamp on back.	Fair

1990.66.42	Tool	Burnisher with wooden handle: light coloured cylindrical turned wooden handle with brass collar, metal shaft is flattened and has blunt bent tip; stamp on back of shaft illegible due to wear.	Good
1990.66.51a-b	Tool	"Pioneer W.C. Co." case back remover tools: a) tapered metal handle with lip on wider end and thin conical ring on other; centre groove on handle; manufacturer's stamp near lip; b) long rectangular grooved handle with one rounded end and shallow round plate on the other.	Good
1990.66.53a-b	Tool	Pair of watchmaking tools: a) fluted goldtone metal body with thin rod shafts on either end, at the tip of one side small round wheel, wheel missing on other end; b) fluted goldtone metal body, smooth at both ends, small metal wheel affixed at each end.	Fair
1990.66.56	Tool	Levin adjustable holder for wrist watch movements: a centre worm screw and two long pegs align and activate two silvertone semi-circular metal jaws; each side of the jaws has a different cup size; manufacturer's name stamped on face of smaller cup.	Fair
1990.66.57	Tool	H. G. Wilson "Marsh Screw Undercutters" in original box: a) conical Nickel-plated metal base with two undercutters on top and two lateral screws aligned with sleeves on sides; deep cardboard square box with green paper cover; hand written note on base; c) full telescoping cardboard lid with finger grip cut-outs on two sides, green paper cover; centre top adhered paper label with product information printed in black.	Fair

1990.66.151	Tool	Small punch press set in case: a) metal press # 8825 with oval base and "C" shaped arm that ends in vertical tube to hold punch in place, under punch holder rotating circular platform with 22 graduated perforations, a circular knob with grip pattern located at base of arm; stamped on base; b) deep rectangular varnished wooden box with hinged lid (lid is detached see c below) and brass metal catch centre front; insert with arch cut-out centre serves as holder for 122 punches in set (not individually numbered), three spaces are empty; small block on bottom holds press in place when stored in box; c) wooden lid has detached from box, has one hinge in place and upper part of brass catch is missing. Press with 122 tools	Fair
1990.66.27	Tool, Remover	Black wooden lift-top cylindrical container with assortment of roller(?) jeweler removers, 9 parts total.	Good
1990.66.3	Tool, Setting	Hinged case with jewel setting tool: one handle and 21 bits in dedicated case.	Fair
1990.66.84	Tool, Unidentified	Long tapered brass tube, narrow end is curved and ends with a tip, wide end is not threaded.	Good
1990.66.95a-c	Tool, Unidentified	Set of three nesting tools (possibly reamers?): a,b) rounded polished metal spring end with tapered jaws ending in convex straight tips with fluted exterior walls; stamped on one side "D.R.G.M. / EXCELSIOR / No 25009; a larger than b; c) same design in brushed metal and stamped "GERMANY" inside one jaw.	Fair
1990.66.96a-b	Tool, Unidentified	Two aluminum rounds with off-centre base, with centre hole (possibly movement holders or parts of case closing tool set): a) larger diameter; has round cut-out on deep well side and two rectangular cut-outs on other edge; has hand engravings on side, some appear to be practice, the most readable: "C E Smith" "1864" " June 1919"; b) smaller round with beveled exterior edge and centre hole; edge has what appear to be geometric marking (test?)	Fair

1990.66.21	Tool, Watchmaker's	Steel and brass, sprung hand tool for stretching pocket watch bands. "L.HUGONIOT-TISSOT" and "MODELE DEPOSE" stamped on handles.	Fair
1974.39.1	Toy, Sound	Discoloured black and white rubber dog that squeaks when squeezed. Please note that the head has broken off the body of dog. Use care when handling as both the head and body are breaking apart, cracked and in poor condition.	Poor
1972.155.2a	Transparency, Slide	"Eezemount" x-ray record, holds 11 negatives, 1 missing, grey card.	Good
2003.4.60	Tray	Deep, rectangular wooden tray partitioned into four equal compartments. Nailed construction.	Fair
2014.INV.539	Tray, Impression	Metal dental full arch impression tray. Arch shaped with tab at middle to hold, stamped "Marrion" on top and bottom.	Fair
2003.4.54	Trowel	Grey sheet steel with flat rectangular base; heavy handle, two holes on handle, handle is riveted onto base.	Fair
1990.66.59	Tweezers	A. Dumont & Fils No. 8 tweezers: brushed metal slightly tapered flat jaws with beveled tips; manufacturer's stamp at fixed end on one side, "8" stamped on the other.	Fair
1990.66.80	Tweezers	#6 hairspring over coiling and forming tweezers: brushed metal springing tweezers with one rounded jaw and one with adjustable length rod; width adjusting screw on side; worn manufacturer's stamp.	Fair
1990.66.81a-b	Tweezers	Pair of metal pointed straight end springing tweezers: a) "G. Boley" german tweezers with wide handle and trimmed pointed straight end; manufacturer's stamp on one side; b) #3 "A. Dumont & Fils" swiss pointed straight end tweezers.	Fair
1990.66.50	Tweezers	Hand remover tweezers: long handles with curved flat tips, groove centred.	Good
1990.66.52a-b	Tweezers	Pair of tweezers: a) 11.5 cm angled tip, fine point metal tweezers; manufacturer's stamp on fixed end worn by use; b) 10.2 cm fine cut point metal tweezers	Fair

2012.INV.136	Type	<p>Rough wooden box with three numbered drawers containing a typesetter's kit. The drawer fronts are painted green with a black steel card frame and cup pull. Drawer "1" is labelled "STAPLES/ PINS ETC" and contains boxes of staples, needles, "Spring Tongue Gauge Pins", pencils, a round file, a stick of red wax, three steel number blocks and a staple remover. Drawer "2" is labelled "NUMBERING/ MACHINE GAUGE PINS" and contains a spool of cord and various thin metal strips. Drawer "3" is labelled "COIN KEYS SPACE CARDS/ ROLLER ENDS" and contains some quoins, strips of card a box of shoe tacks and a circular steel object.</p>	Fair
2012.INV.167	Type	<p>Hamilton Manufacturing Co. deep wooden tray with natural finish, to hold typesetting wooden spacers of various lengths: tray has 84 compartments, divided in four sections, two each of a certain depth numbered from 10 to 51; compartments hold multiple pieces of wooden spacers in two thicknesses (possibly over a thousand pieces, not counted); on top borders, a typesetting ruler on one side and manufacturer's plate on the other.</p>	Fair
2012.INV.168	Type	<p>Deep wooden tray with particle board dividers creating 15 compartments of various sizes and depths to organize typesetting wooden furniture; compartments labelled with appropriate length designation from 10-60; approximately 100 pieces (not counted).</p>	Fair
2012.INV.264	Type	<p>Three containers of loose type. Two are glass jars, one small with no lid and red sediment at the bottom, the other larger with a blue and white "HELLMANN'S" lid. One is a white plastic "COTTAGE/ CHEESE" pot which also contains a rusted foil dish.</p>	Fair
2012.INV.267	Type	<p>Collection of large loose metal type stored in a pot constructed from folded light blue card and cotton string.</p>	Fair

2012.INV.268	Type	Square steel tin with lid, containing eighteen polystyrene cups or fragments of cups, each holding loose metal type of various sizes and styles. Tin is pink with a gold, red and green design of trees and foliage.	Fair
2012.INV.269	Type	Black-painted steel tray containing fifteen sections of cardboard or polystyrene egg cartons, each holding loose type of various sizes and styles. Also contains some small squares of paper with letters pencilled on them, three blocks of wood with curved nails protruding from them and a small clear plastic box containing three type slugs.	Fair
2013.INV.2	Type	Bundle of eight wooden typesetting spacers and a strip of cardboard.	Fair
1982.34.9a-b	Vehicle, Toy	Two very small, metal racing cars (hollow) with moveable tin wheels. One car (a) has remnants of red, yellow and green painted finish with "JAPAN" visible on back top; other (b) is missing almost all it's finish and cannot distinguish any features, other than it is dented. Both are showing signs of discolouration and rust forming.	Poor
1990.66.41	Vial	Small glass vial with round bottom and cork stopper; contains a fine white powder.	Fair
1990.66.87a-d	Vise	Locking tweezers and three watchmaking/jeweler's hand vises: a) long straight end tweezers with locking mechanism, interior tips knurled; stamped on one side: "COMPLIMENTS OF / McKINNEY & Co. Ltd. / WINNIPEG CANADA"; b) hand vise; octagonal tapered handle with round end, wide clamp jaws are flat and are adjusted with butterfly nut; illegible manufacturer's mark on side of clamp; c: "HAT." pin vice, d) hand vise; octagonal tapered handle with masking tape wrapped on end, narrow clamp jaws are flat and are adjusted with butterfly nut, manufacturer's mark partially obscured reads: "?ON GERMANY" on side of handle.	Fair

1990.66.67a-g	Vise	Assortment of jeweler's pin vises with flat tipped blades; a-d, f) K&D cylindrical nickel-plated steel knurled holder with hexagonal swivel knob (b,c octagonal), tightening ring on tip; varying sizes of flat tip blades (to act as screwdrivers); stamped on collar "K&D"; e) green stone or jade holder with plated brass fittings and swivel hexagonal swivel knob, tightening ring and flat tip blade; g) L.S. Starrett cylindrical nickel-plated steel knurled holder with round knob with ring, adjustable tension ring on tip, tightening ring and flat tip blade; stamped on collar: "L.S.STARRETT / ATHOL MASS."	Good
1990.66.71	Vise	Jeweler's pin vise: thin cylindrical fluted goldtone holder with knurled tightening ring, back appears to be missing end cap, possibly an hexagonal or octagonal swivel knob.	Fair
1990.66.38	Vise	Slide lock pin vise (or hand held vise) with wooden handle: turned dark wooden handle, long hollow shaft is formed by two halves, centre core removed, that go through handle, square jaws have round grip marks in two directions, brass sliding ring and collar.	Fair
1990.66.43	Vise	Steel slide lock pin vise (or hand held vise): octagonal handle and round shaft are hollow, round jaws and round brass locking ring with grip pattern on edge.	Fair
2003.4.48	Vise	Metal pliers-like device, blued, spring-loaded to open but with locking ring to hold it closed. Box-jointed, increasing-sized holes across jaws.	Fair
2003.4.50	Vise	Jewelers ball vise for engraving. Two semi-circular steel plates with holes, held in place with a brass ring and mounted with a steel rod onto a very heavy, hemispherical, nickel-plated steel base.	Fair
1990.66.24	Washer	Dark box of "Timing Washers, The Practical Watch Makers System No.22.": dedicated flip-top hinged box with inset that holds 12 small glass vials with cork stoppers, assorted washers in vials, manufacturer's label and specifications inside lid.	Good

1975.14.12	Wax, Dental	Silver and blue box holding casting wax sheets: "KERR/ CASTING WAX SHEETS - PINK/ Gauge No. ASSTD./ Sheets 32". 32 Pink sheets inside.	Fair
1978.92.2	Wheel	Wheel shaped teeth-color matching guide. 30 different colours.	Fair
1990.66.76	Winder, Spring	K & D wrist watch mainspring winder: a) winder: metal tube with long swivel knob, and small body with grip ring; small level on side body extends frontal face; manufacturer's stamp on knob.	Good
1990.66.9	Winder, Spring	"Robins Patented Main Spring Winder, No. 125A" set: wooden block carved to support 1 x winder, 3 x barrells, 9 x arbors inside dark green cardboard box with printed black lid.	Fair
1990.66.54	Winder, Spring	K & D Model 123 wrist watch mainspring winder: a) winder: metal tube with textured handle and tightening ring, push button on back extends frontal face; b) tit: small metal spindle with texture grip on sides.	Good
2003.4.51	Winder, Spring	Circular, nickel-plated base holding a central shaft around which a handle rotates. The base of the handle is wider and scored to give grip. "N543" and "MADE IN FRANCE" are stamped on the base.	Fair
1990.66.78a-d	Wire, Rod	Two staff and pivot watch/clock wire rods in wooden container: a) long narrow wooden tube with one closed end and the other stepped to form lid guide; one side slightly flattened; b) long narrow wooden tube with one closed end; c) 0.17 cm. diameter wire rod with pointed ends; d) slightly bent 0.13 cm. diameter with blunt ends.	Fair
1990.66.94a-e	Wood, Pith	Pith wood used for cleaning pinions: light coloured short cylindrical cuts of pith wood, centre hole on all parts except c; b-d) have visible round marks on flat surfaces.	Good
1997.51.3	Workbench	A long, narrow, rectangular workbench with steel vise attached to the top surface. Beneath the work surface is a shelf with many boxes and containers of tools and supplies.	Fair

1990.66.36a-b	Wrench	Watch/clock making wrenches: a) flat silvertone combination wrench with #18 octagonal open end and 1/2 off-centre closed end; sizes stamped on one side; b) small flat open-ended wrench with one side larger than the other and a small hole centre, no markings.	Good
1990.66.154	Wrench	Wooden handle with 10 sleeves wrenches in storage block still adhered to side of cardboard box.	Fair
2003.4.13	Wrench, Monkey	Wrench with parallel jaws and screw adjustment. Stamped on one side of the top jaw: "SHELLY / BRITISH MADE".	Fair
2003.4.18	Wrench, Monkey	Dark grey metal (case hardened steel) wrench with screw adjustment. Top of the wrench is thinner than the rest of the jaws. "6." printed into one side of the bottom jaw.	Fair
