

Interested in Developing a Virtual Exhibit?

We are a team of professionals employed at UBC and in Public Education engaged by the Vancouver Maritime Museum (VMM) to develop a Virtual Exhibit website with a \$250,000 grant from the Virtual Museum of Canada (VMC).

The exhibit will tell the story of George Vancouver's journey to the Pacific Northwest through short video clips, providing an hour-long experience plus learning activities. Ready by 2021, the exhibit is aimed at students in grades 7,8 & 9.

Full Service

We are wondering if other museums would like to collaborate with us on a future exhibit. We provide a full service if required; early conceptualization and development of the funding application; production management; historical research; website development; instructional design; storyboarding; video production; animation and creation of learning activities.
